Data Privacy Maintenance

pwc

Data Privacy Maintenance («DPM») is the Personal Data Management application designed and developed by PwC Turkey and GSG Attorneys at Law. DPM facilitates practical and user-friendly data protection compliance. It is an end-to-end solution on a single platform.

How can we help you?

Data Privacy Maintenance enables companies to create cooperation among its teams, to create/maintain personal data inventory, generate necessary legal documentation (i.e. notices and consents) and create a structured data privacy process management.

Data Privacy Maintenance includes the following modules:

- Inventory Management
- Privacy Notice and Consent Management
- Request Management
- Maturity Analysis
- Storage and Disposal
- Personal Data Breach Management

DPM at a glance!

- Friendly User Interface
- Flexible Pricing Model
- Continuous Tech and Legal Advisory Support
- One Platform
- Cloud/on Prem Installation
- Integration with Various Tools (Ticketing systems, data discovery tools)
- User Activity Monitoring with Logging Mechanism
